

## NEWS FLASH

SOLAR POWER AND ENERGY STORAGE is about to go viral. The new tax laws have made Solar / Energy Storage projects 100% Tax Deductible in the first year. Depreciating a project in one year offers tremendous tax savings contributing to a great Return on Investment (ROI). On top of the 100% depreciation, there is an additional 30% Federal Tax Credit available to even further improve the ROI.\*

You have the Power to be the Power Company. Today's solar panels offer reliable high capacity power production and our storage systems are the best in class and carry a 25-year warranty. Reliable power there when you need it. The Tax and Financial benefits make Solar & Energy Storage an exceptional investment in infrastructure for your company. Avoid peak rate increases by using power from your own micro grid. Customize a system and use your own power to reduce your utility costs and insulate your company from the inevitable rate increases. Solar Power and Energy Storage Systems are creating a new opportunity for businesses to contain their energy costs. The Tax Incentives are at their peak and are scheduled to decrease over time, so act now for the maximum savings. Contact us to see if Solar or Energy Storage is a good fit for your business.

### Actual Headlines

We pulled just a few of the headlines from the news. I think we all know how quickly things can go sideways. Solar and Power Storage offers the security of having the ability to continue operations in the event of a major power outage. A custom system can be designed to offer power for critical systems like refrigeration / freezer units or a call center or a larger system can allow for uninterrupted operations. Power Outages will continue to disrupt businesses, but now you can take charge of your energy needs.

We would be happy to discuss your power needs and help you to decide if one of our systems would be a good investment for your company.
